PHP/Laravel Engineer with 5+ years of experience building secure, scalable backend systems for e-commerce and educational platforms. Skilled in API development, database optimization, and clean architecture design focused on performance and reliability.

## Core Skills

*Languages & Frameworks:* PHP 8+ | Laravel | HTML | CSS

*Databases:* REST APIs | JWT Authentication

*Tools & Platforms:* GitHub | Tailwind CSS

## Experience

### Full-stack Software Engineer

[Psalmedu.com](#) – Remote | Jan 2024 – Present

- Designed scalable PHP 8+ backend architecture using Laravel and RESTful standards
- Implemented JWT-secured APIs, enabling multi-tenant education services for over 1,000 users.

[Quiz.psalmedu.com](#) – Remote | Jan 2024 – Present

- Designed scalable PHP 8+ backend architecture using Laravel and RESTful standards
- Implemented JWT-secured APIs, enabling multi-tenant education services for over 1,000 users.
- For mock Exam

### PHP Developer

Wach Technology Systems Ltd. – Remote | Jan 2023 – Present

- Engineered modular Laravel backends for scalable SaaS and e-commerce products.
- Migrated monolithic PHP systems into component-based, API-first architecture.
- Applied middleware and dependency injection principles to improve maintainability.

### Backend Developer

Paygital Inc. – Remote | Jan 2022 – Jan 2023

- Developed and maintained secure fintech APIs using PHP 8.
- Designed domain event-driven architecture for transaction notifications.
- Managed cloud-based deployments and load balancing for production stability.

### Web Programmer

Cyberjaskes Media – Nigeria | 2021 – 2022

- Enhanced PHP-based academic and logistics management systems.
- Refactored legacy code to adopt MVC pattern and improve maintainability.

## SOFT SKILLS

- Remote Collaboration, Documentation
- Problem-Solving
- Continuous Learning
- Problem-Solving
- Team Player
- Time management
- Communication
- Leadership

## Work Ethic

- Remote-first communicator, proactive in collaboration across cultures
- Constant learner, adapting quickly to new frameworks and technologies
- Passionate about system architecture, code quality, and automation
- Thrives in fast-paced, evolving engineering environments

[My Progress](#)

[Quiz.psalmedu.com](http://Quiz.psalmedu.com)

**Overview:**

Developed a **multi-course online testing system** with automated scoring and detailed results tracking.

**Key Features:**

- **Unified Test Submission:** Submit multiple courses at once, calculate scores per course, and store detailed answers.
- **Results & Feedback:** Paginated test results showing only answered questions with correct/wrong counts.
- **Auto-Submit & Cooldown:** Automatic background submission with per-course cooldown enforcement.
- **Dynamic Access:** Validates payment, plan expiry, and assigned courses before allowing tests.

**Skills Demonstrated:** Laravel, PHP, Eloquent ORM, database transactions, backend logic, frontend integration, and time-based logic for cooldowns.

**Outcome:** Fully functional testing platform with analytics-ready results and scalable structure for multiple users and quizzes.
